

Kyle Morris
3948 Primrose Ln, #302, Bellingham, WA
360-393-1692 k.w.morris@gmail.com

Dear Director of Human Resources,

I saw the posting for a data and control systems technician (Dragon) on the SpaceX website. My focus of study at Bellingham Tech hands-on and classroom experience with the instrumentation required to excel in this role, as detailed in my attached resume. My work as a member of the prep team at Lynden Door has given me experience performing precision work to support and assist assembly groups.

Space exploration has been a passion of mine since I was little, and want to contribute to expanding humanity beyond Earth. Our efforts beyond Earth require continued access to safe, economical, and reliable transportation to space, for our current mission aboard the ISS, and for future endeavors to the Moon, Mars, and beyond. The Instrumentation and Control Technology program at Bellingham Tech has and will teach me the fundamentals of process measurement and data acquisition

You may reach me by e-mail or messages may be left by phone, ideally between the hours of 3 p.m. and 6 p.m. Your time and attention are appreciated and I look forward to being considered for this position.

Sincerely,

Kyle Morris
