

Smart Wireless Gateway

- *Gateway connects WirelessHart™ self-organizing networks with any host system*
- *Easy configuration and management of self-organizing networks*
- *Easy integration into control systems and data applications through serial and Ethernet connections*
- *Seamless integration into AMS® Device Manager and DeltaV™*
- *Greater than 99% reliability with industry proven security*
- *WirelessHART™ capabilities extends the full benefit of PlantWeb® to previously inaccessible locations*

Success With Smart Wireless

Self-Organizing Networks

With reliability and ease of use, self-organizing networks are perfect in any environment. Multiple communication paths and automatic path configuration result in over 99% reliability and allows you to deploy your instrumentation without a site survey, saving you time and money.

Open Integration

With a variety of options, the Smart Wireless Gateway gives you the freedom to choose the Smart Wireless Solutions best suited for your installation:

Flexible: Using OPC or Modbus TPC allows flexible integration of your wireless network with any host system.

Serial: The Smart Wireless Gateway supports Modbus RTU for integration into legacy host systems.

PlantWeb: The Smart Wireless Gateway natively integrates into any PlantWeb® architecture for ease of use in commissioning your wireless network.

Stand Alone: Every Gateway comes with a web interface that provides a stand alone host interface to manage your wireless network, without a dedicated host system.

Layered Security Keeps Your Network Safe

Emerson Process Management's layered approach to wireless network security ensures that your network stays protected. The network devices implement Encryption, Authentication, Verification, Anti-Jamming and Key Management methods to ensure that data transmissions are secure.

AMS Wireless Configurator

AMS Wireless Configurator uses the power of Enhanced EDDL to assist in the setup and configuration of your Smart Wireless Field Devices and is shipped with every Smart Wireless Gateway.

Powers PlantWeb

The Smart Wireless Gateway powers *PlantWeb*® by giving you access to intelligent devices using WirelessHART technology and seamlessly integrating them into AMS™ Suite software and the DeltaV™ or Ovation™ systems.

Rugged Housing

The Smart Wireless Gateway is suitable for field mounting in any Zone 2/Division 2, general purpose area and is NEMA 4x/IP65 rated. So, the Gateway can be mounted directly in the process environment.

SMART WIRELESS SOLUTIONS

Smart Wireless Field Devices

Emerson Process Management has a family of Smart Wireless products to integrate different measurement types into a self-organized network that optimizes plant performance and reduces risk to personnel. The different measurement types offered include pressure, temperature, discrete, position monitoring, pH, and vibration.

Smart Wireless THUM™ Adapter

The Smart Wireless THUM Adapter incorporates data from any wired HART™ device into the self-organizing network, enhancing plant performance and extending asset life.

AMS® Wireless SNAP-ON™

The AMS Wireless SNAP-ON application helps to plan and validate your wireless network using best practices. It allows for viewing of communication details graphically in real time, and helps maintain the health of your entire self-organizing network.

WirelessHART... The Industry Standard

Self-Organizing, Adaptive Mesh Routing

- No wireless expertise required, devices automatically find the best communication paths
- Network continuously monitors paths for degradation and repairs itself
- Adaptive behavior provides reliable, hands-off operation and simplifies network deployments, expansion and reconfiguration
- Supports both star and mesh topologies

Industry Standard Radio with Channel Hopping

- Standard IEEE 802.15.4 radios
- 2.4 GHz ISM band sliced into 16 radio-channels
- Continually “hop” across channels to avoid interference and increase reliability
- Direct sequence spread spectrum (DSSS) technology delivers high reliability in challenging radio environment

Self-Healing Network

- If an obstruction is introduced into the mesh network, devices will automatically find the best alternate communication path. This alternate path will be created and the information will continue to flow.

Seamless Integration to Existing Hosts

- Transparent and seamless integration
- Same control system applications
- Gateways connect using industry protocols

Smart Wireless Gateway

Flexible Connectivity Options and Easy Device Configuration

Host Integration with DeltaV™ and Ovation®

- Gain real-time information on process and assets with intuitive operator interface
- Native interface between control system and gateway

Flexible Integration

- Smart Wireless Gateway connects legacy hosts, Serial Modbus®, and Ethernet or OPC output

Complete Asset Management with AMS Device Manager

- Manage predictive diagnostics from wired and wireless field devices to identify problems before the process is affected
- Streamline wireless device configuration through Smart Wireless Gateway

Other Interfaces

- Web interface and AMS Wireless Configurator are standard with every gateway for set-up and initial configuration of wireless devices
- Data historian connectivity for documentation and compliance information

Device Specifications

- Update rate: User Selectable 8, 16, 32 second or 1 to 60 minutes
- Network Size: Up to 100 devices
- Output: Ethernet, Modbus, OPC, Serial
- Approvals: FM, CSA, ATEX, IECEx

WirelessHART
Expanding the Possibilities

Specifications

Functional Specifications

Input Power

24 V dc

500 milliamps required to power the Smart Wireless Gateway module.

Environmental

Operating Temperature Range:

-40 to 140 °F (-40 to 60 °C)

Operating Humidity Range:

10-90% relative humidity

EMC Performance

Complies with EN61326-1:2006.

Antenna Options

Integrated Omnidirectional Antenna

Optional remote mount Omnidirectional Antenna

Physical Specifications

Weight

10 lb (4.54 kg)

Material of Construction

Housing

Low-copper aluminum, NEMA 4X

Paint

Polyurethane

Cover Gasket

Silicone Rubber

Antenna

PBT/PC integrated Omnidirectional Antenna

Certifications

Class I Division 2 (U.S.)

Equivalent Worldwide

Communication Specifications

Isolated RS485

2-wire communication link for Modbus RTU multidrop connections

Baud rate: 57600, 38400, 19200, or 9600

Protocol: Modbus RTU

Wiring: Single twisted shielded pair, 18 AWG. Wiring distance is approximately 4,000 ft. (1,524 m)

Ethernet

10/100base-TX Ethernet communication port

Protocols: Modbus TCP, OPC, https (for Web Interface)

Wiring: Cat5E shielded cable. Wiring distance 328 ft. (100 m).

Fiber Optic Ethernet (optional)

100BaseFx optical Ethernet communication port

Wavelength: 1300 nm center

Multimode

SC connectors

Protocols: Modbus, TCP, OPC, https (for Web Interface)

Wiring: 50/125 um or 62.5/125 um fiber, 2.48 miles (4.0 k,) maximum distance.

Modbus

Supports Modbus RTU and Modbus TCP with 32-bit floating point values, integers, and scaled integers.

Modbus Registers are user-specified.

OPC

OPC server supports OPC DA v1, v2, v3

Self-Organizing Network Specifications

Protocol

WirelessHART, 2.4 - 2.5 GHz DSSS.

Maximum Network Size

100 Devices

Supported Device Update Rates

8 sec. to 60 min.

Network Size/Latency

100 Devices: up to 10 sec.

50 Devices: up to 5 sec.

Data Reliability

>99%

System Security Specifications

Ethernet

Secure Sockets Layer (SSL)- enabled (default) TCP/IP communications

Smart Wireless Gateway Access

Role-based Access Control (RBAC) including Administrator, Maintenance, Operator, and Executive. Administrator has complete control of the gateway and connections to host systems and the self-organizing network.

Self-Organizing Network

AES-128 Encrypted WirelessHART, including individual session keys. Drag and Drop device provisioning, including unique join keys and white listing.

Internal Firewall

User Configurable TCP ports for communications protocols, including Enable/Disable and user specified port numbers. Inspects both incoming and outgoing packets.

Product Certifications

Approved Manufacturing Locations

Rosemount Inc. – Chanhassen, Minnesota, USA
 Emerson Process Management GmbH & Co. - Karlstein, Germany
 Emerson Process Management Asia Pacific Private Limited - Singapore
 Beijing Rosemount Far East Instrument Co., Limited - Beijing, China

Telecommunication Compliance

All wireless devices require certification to ensure that they adhere to regulations regarding the use of the RF spectrum. Nearly every country requires this type of product certification. Emerson is working with governmental agencies around the world to supply fully compliant products and remove the risk of violating country directives or laws governing wireless device usage.

FCC and IC

This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions. This device may not cause harmful interference. This device must accept any interference received, including interference that may cause undesired operation. This device must be installed to ensure a minimum antenna separation distance of 20 cm from all persons.

Ordinary Location Certification for FM

As standard, the Gateway has been examined and tested to determine that the design meets basic electrical, mechanical, and fire protection requirements by FM, a nationally recognized testing laboratory (NRTL) as accredited by the Federal Occupational Safety and Health Administration (OSHA).

North American Certifications

N5 FM Division 2, Non-Incendive
 Certificate Number: 3028321
 Nonincendive for Class I, Division 2, Groups A, B, C, and D.
 Dust Ignition-proof for Class II, III, Division 1, Groups E, F, and G; Indoors/outdoor locations;
 NEMA Type 4X
 Temperature Code: T4 (-40 °C < T_a < 60 °C)

Canadian Standards Association (CSA)

N6 CSA Division 2, Non-Incendive
 Certificate Number: 1849337
 Suitable for Class I, Division 2, Groups A, B, C, and D.
 Dust Ignition-proof for Class II, Groups E, F, and G;
 Suitable for Class III Hazardous Locations.;
 Install per Rosemount drawing 01420-1011.
 Temperature Code: T4 (-40 °C < T_a < 60 °C)
 CSA Enclosure Type 4X

European Union Directive Information

The EC declaration of conformity for all applicable European directives for this product can be found on the Rosemount website at www.rosemount.com. A hard copy may be obtained by contacting your local sales representative.

ATEX Directive (94/9/EC)

Emerson Process Management complies with the ATEX Directive.

Electro Magnetic Compatibility (EMC) (2004/108/EC)

Emerson Process Management complies with the EMC Directive.

Radio and Telecommunications Terminal Equipment Directive (R&TTE)(1999/5/EC)

Emerson Process Management complies with the R&TTE Directive

Conditions of Installing N1 and N7:

The Apparatus is not capable of withstanding the 500V insulation test required by Clause 9.4 of EN 60079-15: 2005. This must be taken into account when installing the apparatus.

Combinations of Certifications

KD Combination of N5, N6, and N1.

Dimensional Drawings

FIGURE 1. Smart Wireless Gateway (Dimensions are in inches (millimeters))

Smart Wireless Gateway

Remote Omni-Antenna Kit

Product Data Sheet

00813-0200-4420, Rev AA

January 2009

The Remote Omni-Antenna kit includes sealant tape for remote antenna connection, as well as mounting brackets for the antenna, Lightning Arrestor, and the Smart Wireless Gateway.

Lightning protection is included on all the options. WL3 and WL4 provide lightning protection along with the ability to have the gateway mounted indoors, the antenna mounted outdoors, and the lightning arrester mounted at the building egress.

***Note that the coaxial cables on the remote antenna options WL3 and WL4 are interchangeable for installation convenience.**

Antenna Options⁽⁹⁾	
WL2	Remote Omni-Antenna Kit, 50 ft. (15.2 m) cable, Lightning Arrestor
WL3	Remote Omni-Antenna Kit, 20 ft. (6.1 m) and 30 ft. (9.1 m) cables, Lightning Arrestor
WL4	Remote Omni-antenna Kit, 10 ft. (3.0 m) and 40 ft. (12.2 m) cables, Lightning Arrestor
Typical Model Number: 1420 A 1 A3 A 2 N5	

(1) Single active 10/100 baseT Ethernet port with RJ45 connector.

(2) Additional ports disabled.

(3) Dual active 10/100 baseT Ethernet ports with RJ45 connectors.

(4) Multiple active ports have separate IP addresses, firewall isolation, and no packet forwarding.

(5) 1300nm Multimode Optical fiber connection with separate SC connectors for Rx and Tx.

(6) Includes features of Option 1

(7) Convertible to RS232 via adaptor

(8) Includes Webserver, Modbus TCP/IP, AMS Ready, OPC,

(9) The WL2 - WL4 options require minor assembly.
