Tips for Troubleshooting DVC's

“Start troubleshooting a FIELDVUE Instrument by knowing how it works and then by recognizing device symptoms that are out of the ordinary.

It is easier to recognize bad behavior if you are familiar with normal behavior.”

- *Jeff VonAhnen, Fisher Controls*

Tips for Troubleshooting DVC's

“DVC's *are* SMART positioners, but they *aren't* brilliant. The biggest advantages come from talking with them to find out what they know and then adding your own *brain-power* to the equation.”

- *Eric Barton, PCE Pacific*

HC Diagnostics - Status Monitor

Learn from the Alerts what the DVC knows.

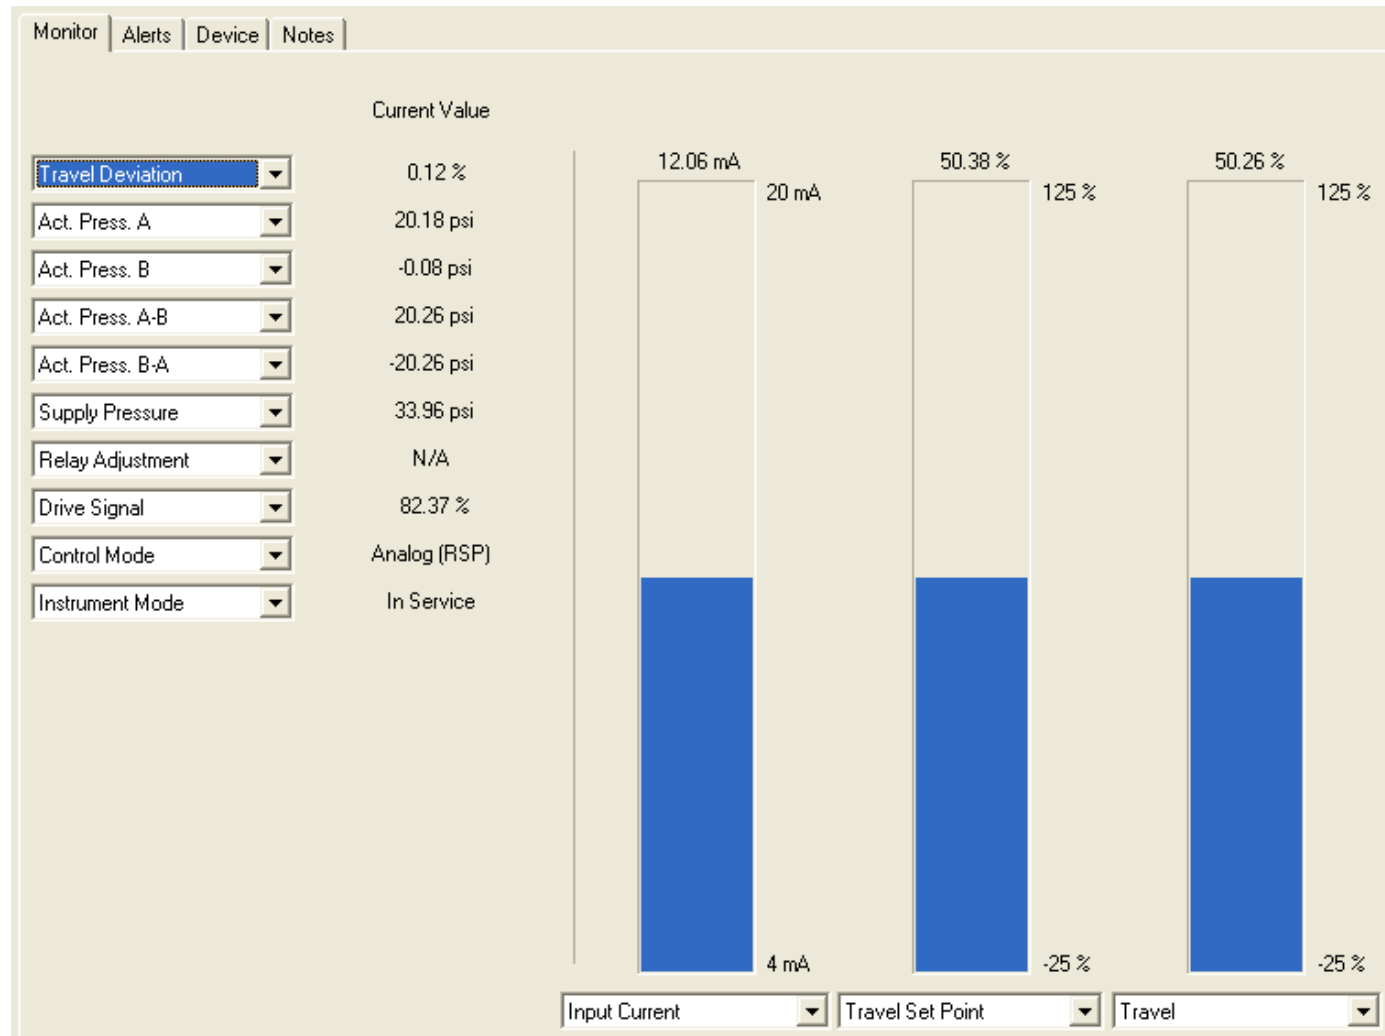

| Monitor | Alerts | Device | Notes | |
|------------------------|---|---------|---------------|----------------|
| | Status | Enabled | Current Value | Alert Point |
| Travel Deviation |  | Yes | 54.49 % | 5.00 % |
| Drive Signal |  | Yes | 99.99 % | |
| Alert Record Not Empty |  | Yes | | |
| Alert Record Full |  | Yes | | |
| Configuration Changed |  | Yes | | |
| Cycle Count |  | Yes | 629 cycles | 1000000 cycles |
| Travel Accumulator |  | Yes | 22024 % | 1000000 % |
| Travel Sensor Fail |  | Yes | | |
| Pressure Sensor Fail |  | Yes | | |
| Supply Pressure Alert |  | No | 0.24 psi | 0.00 psi |

Add what you know to solve the problem.

Actuators need air
to move a valve.
