

Kyle Morris
3948 Primrose Ln, #302, Bellingham, WA
360-393-1692 k.w.morris@gmail.com

Dear Director of Human Resources,

I saw the posting for a Data and Control Systems Technician (Dragon) on the SpaceX website. My study at Bellingham Technical College has provided me with hands-on and classroom experience with the instrumentation required to excel in this role, as detailed in my attached resume. My work as a member of the prep team at Lynden Door has given me experience performing precision work to support and assist other groups.

Space and space exploration has been a passion of mine since I was young, and I want to contribute to expanding humanity beyond Earth. Our current mission aboard the ISS, and future missions to the Moon, Mars, and beyond, require continued access to safe, economical, and reliable transportation to space. The Instrumentation and Control Technology program at Bellingham Technical College has and will teach me the fundamentals of process measurement and data acquisition to help with this goal.

You may reach me by e-mail or messages may be left by phone. Your time and attention are appreciated and I look forward to being considered for this position.

Sincerely,

Kyle Morris
